

vCollection

Software for Art Collectors

available for Mac, PC, iOS, developed with FileMaker Pro Advanced 17

Single-user configuration

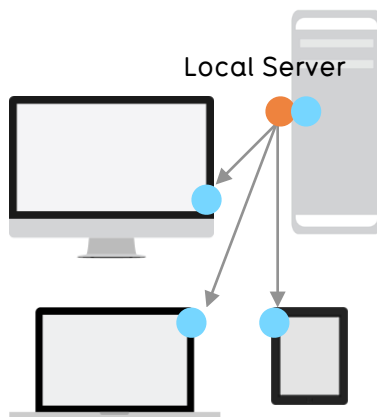

Standalone version provided with an installer.

In its standalone version, vCollection can be installed on a computer or iPad *. You can also copy vCollection on a USB Memory Stick and make it run on another computer from the Memory Stick.

Price: €99 *

Multi-user configuration

Installation on a local network.

The computer that host vCollection is set as a server. Other users can access the database via the local network. This configuration allows several users to work simultaneously on all devices, including the server.

Price: €99 + FileMaker Pro licence for each computer*

Installation on a remote network.

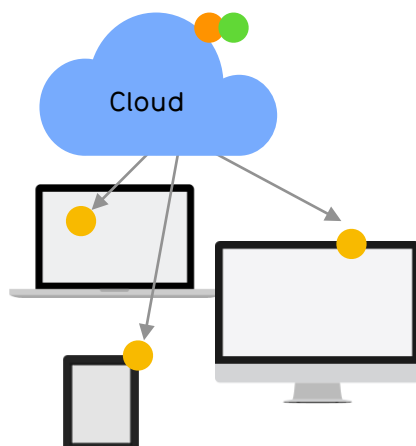

vCollection is hosted online, on our dedicated server. Users connect the application via the Internet.

You can access vCollection anytime from any computer, iPad or iPhone * connected to the Internet. This configuration allows several users to use the application simultaneously.

Performances can vary according to the Internet speed on connected devices.

FileMaker Pro (client) licences are included in the server subscription.

Prix : €14 /month (annual invoicing)
